

Homework #3**due Wednesday, Nov 6th (end of day)*****individual assignment***

In this assignment you are asked to develop a proposal for the Auto Insurance data science project. *This should be from your individual perspective and not the perspective of the group, given the information that you have or you can find.* While it is desired to obtain more information and clarity about the project, you should address any uncertainty that arises at this time due to lack of it and state your assumptions and provide solutions.

Please read Chapter 13 and Appendix A and B from Data Science for Business book and consider the provided list of questions in Appendix A in writing your proposal. Your proposal should cover all the components involved in the project: (1) business and data understanding, (2) data preparation, (3) modelling, and (4) evaluation and development. Expected length ~2 pages.
